Client Name	_____	Name	_____
Address	_____	Species	_____
_____	_____	Breed	_____
_____	_____	Sex	_____
Telephone	_____	Color	_____
		Markings	_____
		Birth Date	_____

Your pet will be undergoing general anesthesia plus a surgical procedure today. In order to recognize any underlying abnormalities your pet may have, we recommend having a pre-surgical blood profile run on your animal. This consists of a CBC, which will check blood cells, and an ALT, ALKP, CREA, GLU, TP, and BUN, which will check blood glucose, kidney and liver enzymes.

These blood tests will help us to assess the health status of your pet more completely and determine if there are any additional precautions we need to take before surgery.

There is an additional charge for these blood tests. The additional charge for pre-anesthetic blood testing is \$75.00. We hope you understand the need for these important tests.

While your pet is under anesthesia, we also recommend that he/she is microchipped using the Home Again microchipping system. This is a safe and effective procedure that combined with advanced technology and a national network enables quick recover of a lost or stolen pet. The additional cost is \$65.00.

I DO \_\_\_\_\_ I DO NOT \_\_\_\_\_ wish for my pet to be micro-chipped.

I DO \_\_\_\_\_ I DO NOT \_\_\_\_\_ wish to have pre-anesthetic blood testing
